

Scissor SKILLS

Cutting Practice • Fine Motor

Graded Practice • Ages 3-6 • US Letter + A4

Dear Grown-Up,

Cutting is a key fine-motor and hand-strength skill — and the foundation for handwriting. This book follows a real difficulty ladder: snip strips first, then straight lines, slanted lines, zig-zags, waves and curves, and finally cutting around shapes.

Always use child-safe scissors and supervise. Start at the little scissors mark and follow the dotted line. Short, happy practice sessions work best. ☐

Snip Strips

Make little snips into each strip!
